

**Technical Description of the Product**

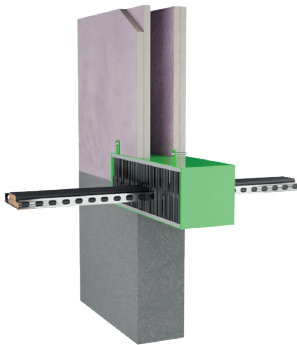

Pass-It Transit System is a pre-assembled, intumescent device encased in a 2-part steel shell. It is designed to prevent the passage of fire between rigid and flexible compartment walls as a pre-fit system as part of a modular build or retro-fit. The Pass-It Transit System is unique as it allows for fire stopping to be completed prior to the installation and positioning of services

Pass-It Transit allows for single or multi-serve penetrations, where there is a requirement to change the service on a regular basis or allows for the provision of services at the point of the being unknown. There are various sizes available depending on the aperture size and the quantity/size of the services. Pass-it® Transit System has been tested and Certified as part the FSi Fire Stopping range. The Pass-It system can be installed across a variety services and substrates.

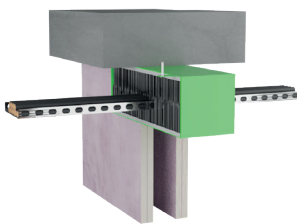

**Intended Areas of Use:**

- To reinstate fire resistance Flexible and Rigid Walls where penetrated by services
- Single service penetrations
- Multi-service penetrations
- Assumed working life 25 years
- For internal use

**Key Product Advantages:**

- Very easy to install
- Designed practically with the installer in mind
- High performance intumescent
- Allows for flexibility in service location
- Allows mechanical movement of services
- Ideal Modular builds
- Can accommodate regular changing of services without disrupting the seal
- Manufactured and tested alongside the FSi Fire Stopping range in the UK.
- Tested in accordance with EN1366-3:2009 – Fire Resistance – Penetration Seals
